

National Digital Health Strategy 2019–2024

South Africa · 2019 · English

Establishes a unique patient identifier system and shared data standards to connect provincial health information systems into a single interoperable network.

Placeholder document. This file was generated as sample content for the eHealth Strategies Registry starter project. It does not represent an official government publication. Replace this file with the genuine, official strategy document before publishing this site — see README.md for instructions.

Note: Provincial implementation guidance is published separately by each province's Department of Health.
